AT A GLANCE

Experienced Senior Full-Stack Developer with a decade of expertise in building scalable web applications and modern software solutions. Proficient in designing, implementing, and maintaining complex projects within agile development teams.

Specialized in React, Next.js, TypeScript, and Material UI for the frontend, as well as Node.js and NestJS for the backend. Extensive experience implementing modern APIs with GraphQL, REST, and WebSockets. Expert in Docker integration and CI/CD pipelines for efficient deployments, as well as utilizing MongoDB or relational databases as data solutions.

Key contributor to the development of a digital real estate management solution, a monitoring platform, a social media platform, and the advancement of applications for public transportation. Consistently focused on performance, user experience, and sustainable software architecture.

As a mentor and open-source contributor, I support teams in adopting best practices and ensuring code quality.
